

*Gannet International* is a full service unmanned systems and advanced technologies company headquartered in Alexandria, VA, with locations in Washington, DC, Chicago, IL, Mountain View, CA, Santa Rosa Beach, FL, and Farmington and Santa Fe, NM.

We provide consulting services and technical expertise to Federal and State governments, domestic [U.S.] municipalities, commercial, and private sector organizations on the implementation, utilization, and future integration of Unmanned Aerial Systems (UAS) into the national airspace and international flight management systems. Our unparalleled knowledge of the complete spectrum of unmanned platforms, systems technologies, and agency programs and directives provide our clients with unequaled insights into government processes and policies, operations management and implementation, and platform selection and sustainment.

With more than two decades of experience in the U.S. Military, Legislative and Executive offices, Federal Bureau of Investigations, Department of Defense Acquisitions, National Aeronautics and Space Administration, Contract Law, Commercial Airlines, Intelligence Services, Law Enforcement, Think Tanks, and Academia, our professionals recognize the benefits that unmanned systems bring to the U.S. market and understand the political and administrative climate for which to garner support. Through extensive relationships and a highly respected reputation as leaders in the UAS field, *Gannet International* is an important catalyst for which to influence and coalesce real and lasting guidance in support of domestic and international (public and private) UAS operations and your business objectives.
